

# install and maintain

## 1. preparation

### Acclimatising

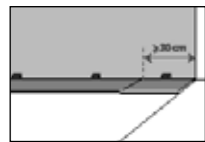

Allow your flooring to adjust to the temperature of the room in which it is to be installed. The packaged flooring should be placed in the room for a minimum of 48 hours prior to installation.

### Direction

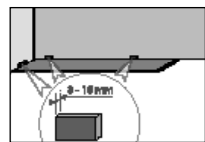

While your floor is acclimating, take the opportunity to set the direction of installation! Always take into account the light source and the main direction from which the floor will be viewed. Tarkett recommend laying panels lengthways in accordance with the main viewing direction and main source of light.

## 2. installation

### Installation basics

- Laminate flooring should always be laid as a floating floor (i.e. the boards should never be fixed to the sub-floor in any way).
- Boards should be staggered by a minimum of 30 cm and should always have a length > 30 cm.

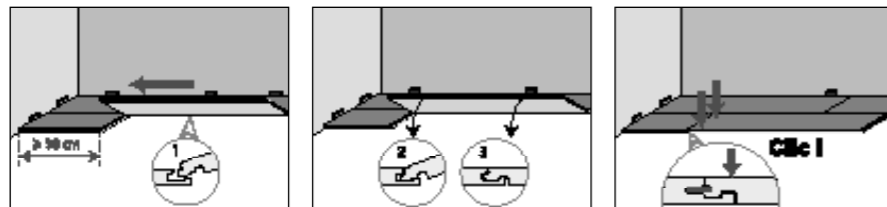

- Allow for an expansion gap of 8-10 mm between the flooring and any fixtures (walls, pipes, door-stops, etc).
- In corridors and rooms longer and/or wider than 10 meters, expansion provision should be allowed for and covered with a matching transition profile.

### How to instal your laminate flooring?\*

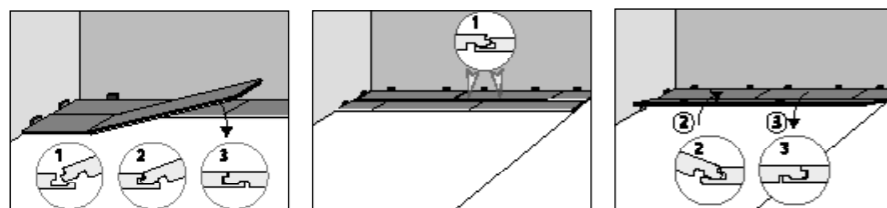

- Glue-free systems.
- No special tools: a pencil, ruler and saw are about all you need.

### 2-lock

Fold-down system! It's so easy 2-Lock, it takes 50% less time to instal the flooring!

### And walk over your flooring as soon as it is laid!

### T-lock

Angle system: angle-angle-angle: it is locked and will stay firmly clicked in place for many long years!

\*Always refer to and follow the installation instructions provided with your laminate flooring.

## What you need to know about under-floor heating & laminate

- Laminate flooring is suitable for installation above under-floor heating systems, provided that the heating element is embedded in concrete or another sub-floor. Laminate flooring is not suitable for installation above under-floor heating foil installed above concrete or any other sub-floor, unless otherwise specified by the under-floor heating manufacturer.
- Laminate flooring surface temperature should never exceed 28°C.
- Laminate flooring can be installed on low-temperature water-based under-floor heating systems with a maximum 28°C surface temperature.
- Standard electrical under floor heating foil systems can generally reach a surface temperature of more than 28°C when turned up to maximum operating temperature, which is not compatible with laminate flooring. If you are using an electrical under-floor heating system, make sure you have a self-regulating system in order never to exceed 28°C.

## 3. maintenance

### Cleaning, so easy!

**Regular cleaning**  
vacuum and dry-mop.

**Occasional cleaning**  
if needed, you can damp-mop your floor.

**Every 2 weeks**  
Use a cleaning solution suited to laminates, rinse the mop thoroughly, and dry-mop your floor when finished.

### Stains

Remove stains, spots, etc. as they occur. Rub the stain with a clean, dry mop moistened with a dedicated cleaning agent. Never spray any cleaning agent directly onto the floor. When using a solvent or concentrated cleaning solution, read the safety advice carefully!

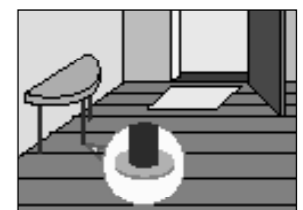

STAIN	RUBBER, PLASTIC, HEEL MARKS	BLOOD, URINE	NAIL VARNISH, SHOE POLISH, PAINT, INK, LIPSTICK	FRUIT, MILK, BEER	CANDLE WAX, CHEWING-GUM
SOLUTION	Rub the mark with a dry cloth. Use acetone if needed. Once dry, brush it off with a white nylon pad.	Wipe the stain with a slightly damp cloth. If dry, rub it down with a dry nylon pad.	Remove with a cloth soaked in acetone, nail-tar varnish solvent, paint thinner or vinegar essence.	Remove with an absorbent dry cloth. If dry, wipe down with a dedicated cleaning solution (ideally Tarkett Bioclean), then wipe dry.	Once hardened, these should be removed with a blunt plastic scraper.

### Bio clean 1

- Economical and effective general purpose cleaner.
- Gentle on the skin.
- Biodegradable.
- Free from organic solvents, colouring agents and phosphates. Code: 8792120

### Prevention always helps!

- Place door-mats and foot brushes at all exterior doorway entrances.
- Fix felt protectors under furniture legs.

### Disposal? Recycling?

- You can dispose of your laminate flooring in normal household waste, or disposal waste for large quantities.
- Laminate flooring can be reused or recycled as an energy source.

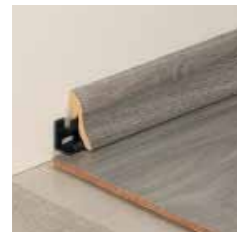

### Repair kit 2

A complete kit for repairing dents or scratches, in the unlikely event this should happen! Code: 8264000

# Tarkett offers complete solutions to install

# and finish your flooring

## matching concept

40 mm

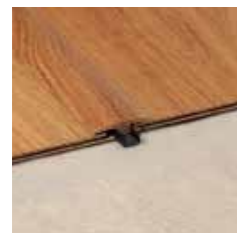

90 mm

60 mm

scotia

transition profile

reduction profile

For a perfect finish, Tarkett offers a complete range of matching accessories for all its flooring decors.

### The skirtings

The final decorative touch available in 4 shapes to match everyone's tastes and needs.

- Made of MDF & coated film for guaranteed quality & resistance through time
- Quick & easy installation with clip system (for 40 & 60 mm high skirtings)
- Colours matching floor designs
- Practical length - 2 400 mm

### The profiles

Transition & reduction profiles provide the perfect way to give the decorative finishing touch to your flooring installation.

- Highly resistant thanks to a specific overlay (AC3)
- Made of low swelling HDF/E1 for guaranteed quality & resistance through time
- Quick & easy installation with fixing strip
- Colours matching floor designs
- Practical length - 2 000 mm

To choose the perfect match, go to page 64.

## the 3 in 1 profile is the perfect solution for solid finishes

Transition between two floors, reduction or end profile, this incredible 3 in 1 profile does it all! And thanks to its aluminum composition, it will last for years. Code: 8014003

end cap

reduction

transition

## the renovation skirting

**The smart solution!** Tarkett renovation skirting is the ideal solution to cover existing skirtings (difficult to remove skirting like ceramic for example). You will not loose time nor damage your wall! This new generation skirting is available in white (paintable) and classic oak wood colour. Dimensions: 16 x 130 x 2 200 mm. Code: white: 8301555 – wood: 8301777

## all you need to prepare your subfloor

### PE Foil - Vapour Barrier

Must be installed under all flooring (except if you use our 3 in 1 Soundblock foam)  
PE-FOIL 200µ  
2 x 13 m - 1 Unit = 4 rolls in a carton  
code 8021001

### Standard foam (2 mm)

Noise and heat insulation -  
■ Reduces impact noise from 18 dB  
■ Corrects the unevenness in the floor  
Recyclable polyethylene, freon free  
1 m x 20 m = 20 m<sup>2</sup> - 1 UN = 4 rolls  
code 8021000

### Soundblock foam - 3 in 1 (3 mm)

1- Vapour Barrier  
2- Noise and heat insulation - Reduces impact noise from 19 dB  
3- Corrects the unevenness in the floor  
Recyclable polyethylene, freon free, with closed cell structure  
1,2 m x 16,7 m = 20 m<sup>2</sup> - 1 UN = 1 roll  
code 8267000

### And the spacers !

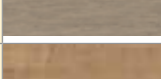

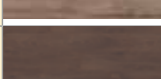

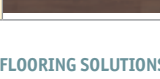

Very useful accessories!  
The spacers guarantee a correct installation: they ensure there is the correct gap between the wall and the flooring.  
This gap is called the 'expansion gap' and is needed to make sure the floor will have enough space to move when it expands (with heat and humidity).  
50 spacers in a box  
code 8022000

## all you need to install your floor !

For all installation and maintenance details, go to page 60. For all details on accessories, go to page 64.

## unique solution : Aquastyle installation, simple steps to prevent water ingress!

1 2 Lay Aquastyle PE foil on the floor from wall to wall all around your room, then fasten it in place with Aquastyle installation tape.

3 Complete the installation by fitting the Aquastyle skirtings, which will also prevent water ingress along walls.

4 Lay your Aquastyle 832 boards. Apply Aquastyle Edge Protect on to the cut boards.

BEFORE INSTALLATION		
Name	PE-FOIL 200µ (Aquastyle Underlay)	INSTALLATION TAPE (Aquastyle Tape)
SAP-code	8021001	8026000
Dimensions	2 x 13m	50mm x 25m
Ordering Unit	1 Unit = 4 rolls in a carton	1 UNIT = 4 ROLLS IN A CARTON
DURING INSTALLATION		
Name	AQUASTYLE EDGE PROTECT	
SAP-code	8023000	
Dimensions	0,2L can	
Ordering Unit	1 Unit = 4 cans in a carton	
AFTER INSTALLATION		
Name	AQUASTYLE SKIRTING	AQUASTYLE FITTING KIT
SAP-code	White / 8016999 Grey / 8016998	White / 8017999 Grey / 8017998
Dimensions	63 x 26 x 2500 mm	2 left & 2 right caps / 3 jointers / 6 inner corners / 2 outer corners
Ordering Unit	1 Unit = 1 Box = 4 Skirtings	1 Unit = 4 kits in a carton (1 Kit = 15 pieces)

# the clip holder

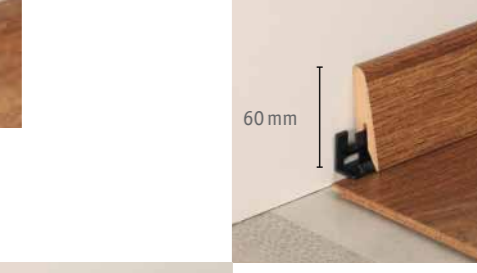

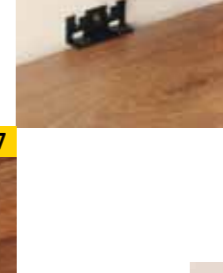

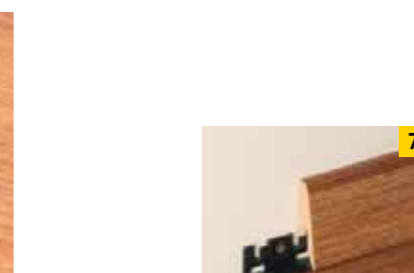

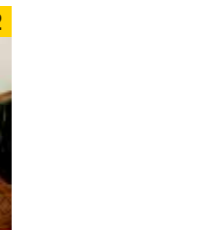

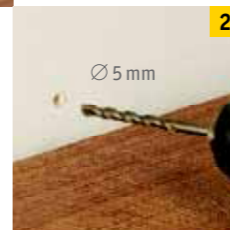

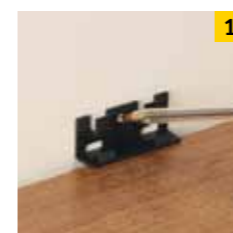

## new fixing system for skirtings
